

SOLID STATE MESSAGING SYSTEM

- Low cost, high quality, stereo announcement module allowing selection and playback of pre-recorded audio messages (e.g: bus stops, safety announcements, sections of a tour, promotional messages... etc)
- Compatible with sound files ranging from a few seconds to several minutes in length
- Ideal for moving-vehicle applications, where safety, warning and promotional messages require playing on a regular basis
- Ideal for providing clear and concise messages where the driver / operator may be too busy or unable to do it personally
- Sound files and titles stored on SD card, allowing for quick and easy replacement of sections at a later date
- In-built LCD screen allows for easy selection of the right message
- Very simple to use
- Output power of module is virtually unlimited, as system can be run into an external power amplifier
- 12Volt unit, but module can be run on 24Volt or other power sources with suitable adaptor (optional)
- H: 195mm, W: 100mm, D: 40mm
- Part Ref: **AV12SLTS**
